

Interoperability Sherpas

Interoperability requires a multi-disciplined team to cover all aspects of clinical data exchange: Informatics, Data Security, Data Standards, Data Quality, Business Analysis, IT Analysis and Clinical Analysis.

Reduce risks to patient safety
by having complete
longitudinal patient data.

**REDUCE YOUR
RISK NOW!**

Call J P Systems for a free
consultation on your EHR
implementation or
transition.

**BETTER DATA
BETTER PATIENT CARE
BETTER OUTCOMES**

Stop Faxing Now!

Use Direct Secure Messaging

NEW - you can securely send HIPAA data via Direct Messaging to 2 million providers & facilities including Long Term Care!

Faxing medical records for referrals now takes to 2-3 weeks. The same data can be transmitted with Direct in 2 hours to 2 days.

Faxes are not secure for HIPAA data – Direct is!

- ❖ Your certified EHR system already has Direct Secure Messaging.
- ❖ Direct Secure Messaging sends and receives HIPAA data securely.
- ❖ **No EHR system?** No problem. Use Direct Mail through a web portal to send patients records to the 2 existing million providers with a Direct address.

Better Data is realized when our team of Healthcare IT experts and clinicians work with your team.

Better Patient Care is achieved when clinical data is complete and accurate.

Better Outcomes happen when Clinical Decision Support systems use standardized data.
