Primary: 541512 Computer

Delivering Mission-Focused Healthcare IT & Digital Transformation Services

The Category C scope provides Federal agencies with mission focused customized solutions to upgrade your Information Technology, Communication, and Audio-Visual (ITC/AV) infrastructure including custom computer programming services, network operations, AV, and Communications based engineering and design services, technical analysis services, network operation and computer facilities, digital government services, and cybersecurity services. Services may be performed at Government and/or Contractor locations worldwide, as specified in each Order. Product only requirements are not in scope for this category.

Category C has a threshold restriction of $2 million per order (inclusive of options) for the 1st year of contract performance and $10 million per order in the 2nd year of contract performance. Category C threshold restrictions are subject to removal beginning in the 3rd year of contract performance.

Background

J P Systems was founded in 1983 to serve IT data management needs in both the private and public sectors. J P Systems has been supporting the Veterans Health Administration (VHA) as a prime since 2015 and as a subcontractor since 1998. We provide unique professional skills in the Healthcare IT (HIT) ecosystem and have performed solidly as a prime contractor on over $154M in Federal contract awards for several VHA program offices. Our services include designing and developing data models, standardized reference terminology models, data architecture, IT policy and strategy, planning for clinical data exchange, external partner engagement, onboarding, and design of pilot projects for standards-based data exchange between Federal agencies and healthcare providers.

Why Choose J P Systems?

- ✓ 40+ Years Supporting Federal Missions
- ✓ Prime Contractor Supporting Veterans Health Programs
- ✓ Healthcare IT & Interoperability Specialists
- ✓ FHIR, SNOMED CT & LOINC Expertise
- ✓ Enterprise Architecture & Data Governance Leaders
- ✓ Proven Federal Healthcare Modernization Experience

- HIT Tooling for Standards Development

Business Architecture

- Business Process Analysis
- Data and Process Modeling
- Functional Gap Analysis
- Detailed Clinical Models

J P Systems
SEWP VI Category C: ITC/AV Mission-Based Services

A Proven Team of Specialized Partners
Together, the J P Systems SEWP VI Category B team delivers enterprise-wide technology, healthcare modernization, cloud, interoperability, analytics, and strategic consulting solutions to support complex Federal missions.

J P Systems, Inc.
With decades of experience in large scale healthcare systems, our innovations turn your concepts into a reality – helping clients cut costs and save time. Founded in 1983, J P Systems' deep knowledge of international clinical data standards and reference terminologies service as a foundation on which to architect data exchanges.

Edera
Edera L3C is a mission-focused, low-profit health care consulting firm. With our holistic human-centered approach, best-in-class consulting protocols, industry-specific best practices, bespoke technological tools, and commitment to delivery excellence, Edera creates value that lasts.

INSI Cloud
INSI Cloud tackles complex technical challenges by staying ahead of the curve in emerging technologies. Their experts are deeply immersed in the latest innovations, continuously exploring effective ways to apply them for real-world impact.

Ready Computing
Ready Computing was launched in 2011 to implement health information exchanges for clients in both the public and private sectors. They expanded their offerings to include two software products, Channels360® and Wellbase®.

Synensys
Synensys addresses safety and quality gaps in high-risk industries such as Healthcare, Aviation, and Defense. They helped over 500 high-risk organizations achieve better outcomes through the development of safer systems and operators.

Westat
Westat offers data science, survey design, statistical methods, program evaluation, capacity building, clinical trials management and operations, bio statistics and epidemiological studies, and communication and dissemination strategies.
